About

Passionate and results-driven Frontend Engineer with over three years of hands-on experience in building and optimizing user-centric web applications. Proficient in modern JavaScript libraries and frameworks, including React.js and Next.js. My freelance projects have given me a strong foundation in a full-stack development environment, managing projects from initial concept through deployment. Eager to contribute my skills and learn within a collaborative team to create high-performance, responsive, and visually appealing web experiences.

Experience

REACT, NEXT JS DEVELOPER | ITALY DESTINATION SERVICE - CASPER, WY | APRIL 2021 – PRESENT

- Architected and implemented a global state management system using Redux and Redux Toolkit, improving application responsiveness by 16% and streamlining complex data flow.
- Reduced initial page load times by 20% by implementing optimization techniques like code splitting and lazy loading, directly enhancing the user experience.
- Developed and maintained key features for a responsive, scalable single-page application (SPA) using React.js and Next.js.
- Integrated third-party REST APIs for core features, including booking and content management systems.
- Collaborated closely with UI/UX designers to translate Figma mockups into high-fidelity, interactive components, ensuring a pixel-perfect user interface.
- Maintained code quality and consistency by actively participating in peer code reviews and adhering to best practices within an Agile/Scrum environment.

Projects

- Project Title: Events-Board
- Description: Full-stack event booking and management SaaS platform engineered with Next.js 15 App Router, TypeScript, and serverless architecture, delivering seamless event discovery, real-time booking, and secure payment processing for modern event organizers.
- Cloud-Native Architecture: PostgreSQL database with Prisma ORM, automated CI/CD pipelines, and multi-environment deployments.
- Secure Authentication: NextAuth.js with OAuth 2.0, role-based access control, and JWT token management.
- Payment Integration: Stripe Payment Intents API with webhook validation and PCI-compliant transaction processing.
- Performance-Optimized: React 19 Server Components, TanStack Query caching, Zustand state management, achieving 95+ Lighthouse scores.
- Scalable APIs: RESTful endpoints with server-side validation, CRUD operations, and PostgreSQL connection pooling.
- Scalable APIs: RESTful endpoints with server-side validation, CRUD operations, and PostgreSQL connection pooling.

Skills

- Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
- Libraries & Frameworks: React.js, Next.js, Vue.js, jQuery
- State Management: Redux, Context API
- Styling: CSS-in-JS (Styled Components, Emotion), Sass/SCSS, Tailwind CSS, Bootstrap
- Tools & Platforms: Git, GitHub, Webpack, Babel, npm, Vercel, Netlify
- Backend: Node.js, Express.js, RESTful APIs

Education

NURSING | SEP 2009 - JUN 2012 | IVANO-FRANKIVSK BASIC MEDICAL COLLEGE, IVANO-FRANKIVSK, UKRAINE
